

# Special Form Certificates

The serial number for each source has a two or three digit prefix, which is related to the applicable special form certificate as shown in the table below. For example, a source with serial number 75-2345 (prefix 75) would use special form certificate USA/0614/S. The certificates are in Adobe Acrobat 3.0 format.

For source codes with an asterisk (\*), these may no longer be considered special form. Visit the [Special Gauge Shipping](#) page for more information.

Source Code	Nuclide	Activity mCi	Special Form Certificate	Expiration Date	View
CC*	Cs-137	8	USA/0673/S replaces GB/140/S	11/30/2018	<a href="#">view</a>
